Graduate Research Assistantship at NMSU

The Physics Department at New Mexico State University (Las Cruces, NM, U.S.A., http://physics.nmsu.edu) anticipates a graduate research assistantship (to complete a Ph.D.) beginning August 2003. The position is for three years with a salary of about $20,000 a year plus tuition and fees. The research topic is acoustic tomography of the atmosphere, both theory and analysis of experimental data. The latter will be obtained with the use of a state-of-the-art array for acoustic tomography of the atmosphere, which will be built at the NOAA Environmental Technology Laboratory (Boulder, CO). The graduate student will also be supported for two trips to the Laboratory (each for 14 days). The graduate advisors will be Dr. George Goedecke (Professor and Department Head Emeritus) and Dr. Vladimir Ostashev (College Professor). If interested, please contact Vladimir Ostashev: vladimir.ostashev@noaa.gov.
